

HELP! Mega Meike

Meike is a two year old girl who is fighting against a **life threatening disease**. She has been diagnosed with neuroblastoma; a pediatric cancer. She is facing a massive battle with survival chances of 40 to 50%. After treatment in the Netherlands Meike and her parents will have to travel to Philadelphia, USA.

The hospital there has developed a treatment to further increase Meike's chance of survival with another 20%. Only part of this therapy is covered by the health insurance. In order to make this treatment of approx. 6 months possible, financial recourses are needed. With your donation we can make the treatment in America possible and increase Meike her chances of survival considerably.

Will you help Meike?
